Worksheet 2

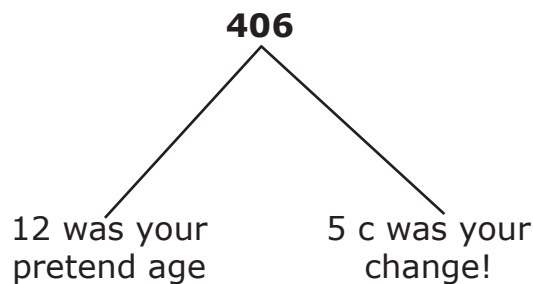

Multiplying Mice Magical Formulas 2

Here's another mathematical situation for you to try.

Magic Formula	Example:
1. Write down the number of the month you were born 2. Double it 3. Add 5 4. Multiply that by 50 5. Now add the day of the month you were born 6. Subtract 365 7. Add 115	Let's say April = 4 $4 \times 2 = 8$ $8 + 5 = 13$ $13 \times 50 = 650$ 6th April, $650 + 6 = 656$ $656 - 365 = 291$ $291 + 115 = 406$

The answer will be your birthday — first the month and then the day!

In the example, your answer was:
