

# ZIPTALES

## Worksheet 3

# Snake!

## Research Project

1. Have you ever seen a snake? \_\_\_\_\_
2. If so, where did you see it? \_\_\_\_\_

Snakes are quite amazing to watch, they can move at a snail's pace or at lightning speed. Watching them slither along the ground is an awesome experience, either fascinating or terrifying depending on how you feel about snakes!

There are many different kinds of snakes. The snake that was coiled on Alan's stomach was obviously a very deadly one or else they would not have been so concerned for his welfare!

**3.** Research any **deadly** snake of your choice. Design a poster about your snake and include the following information:

- a. Name of the snake.
- b. What colour is it?
- c. How long does it grow?
- d. Where is it found?
- e. What does it eat?
- f. What are some other interesting facts about the snake?

Don't forget to use colourful headings and illustrations to decorate your poster!  
The information must be written in your own words.
